VEC's vision is to be the go-to organization for the environmental business sector in Vermont. VEC's mission is to promote growth and job creation in Vermont's environmental business sector.

VEC advocates for and promotes Vermont's environmental business sector; forges links among business, government, non-profits and higher education to grow the green economy by promoting research, education, training, and job creation; networks with potential clients, resources, and support services through conferences, workshops, referrals, and other venues; and plans and initiates projects in partnership with, and for the benefit of, their members.

GWC has provided administrative services to VEC since the Fall of 2012. Services include, but are not limited to, membership management, event planning, communications, updating of websites, and project administration. We have managed and planned, with the VEC Board of Directors, their annual Water Quality Conferences since 2013. VEC was named in the Vermont 2020 comprehensive economic development strategy report (CEDs) stating, "The Vermont Environmental Consortium has been working for the past several years to identify and work with green businesses to build on the strengths of the cluster."
